

ACV Schematic

LEAD FREE*

LFF113-12 (Globe) Solenoid (On-Off) Control Valve (4" and Smaller)

Features

- Electrically operated on / off (open / closed) valve
- Normally Open or Closed operation
- Solenoid equipped with Manual Operator

Standard Components

- 1 - Main Valve (F100 - Single Chamber)
- 2 - 3-Way Solenoid
- X - Isolation Cocks

Options and Accessories

- FC - Flo-Clean Strainer
- Y - Y-Strainer (Replaces Flo-Clean)
- ACS - Adjustable Closing Speed (Replaces Fixed Orifice)
- AOS - Adjustable Opening Speed
- P - Position Indicator
- L - Limit Switch

Operation

The ACV Solenoid On-Off Control Valve is designed to open fully or close drip-tight as commanded by the 3-Way Solenoid Pilot. The Solenoid Pilot commands the routing of fluid and pressure into and out of the cover chamber of the main valve. When the Solenoid Pilot connects the cover chamber of the valve to upstream pressure, the valve closes drip tight. When the Solenoid Pilot connects the cover chamber of the valve to downstream pressure (dry drain) or atmosphere (wet drain), the valve opens fully. Engaging the Solenoid Manual operator simulates power to the solenoid, manually controlling the main valve. Disengaging the Solenoid Manual operator returns the valve to electrical on-off service.

Specify voltage and MAIN VALVE actuation (energize to open or close), and "wet" or "dry" drain PRIOR to ordering.

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.
