

Advancing Technology for Fire Protection

NFPA13—compliant isolation valves
with integrated supervisory switches

Lead Free*
Slow-close ball valve

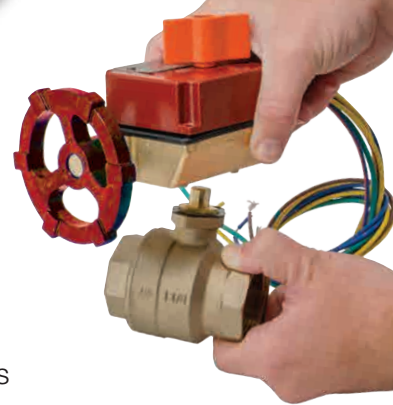

LFAFBV-FP

Gear-operated Ball Valve

- 1", 1 1/4", 1 1/2" & 2" diameter, full-port, gear-operated ball valve for fire-suppression system isolation
- Slow-closure rate effectively prevents water hammer and complies with NFPA 13 (6.7.1.2)
- Threaded and grooved end connection options
- Reversible supervisory switch box simplifies electrical wiring access
 - UL/FM rated to 400psi to accommodate higher-pressure applications
 - Contains two pre-wired single-pole, double-throw, position-indicating supervisory switches
 - NEMA 4-rated for indoor and outdoor use
 - Can be wired normally open/normally closed
 - Available on Ames small diameter backflow assemblies

Reversible
Supervisory
Switch Box
for easy wiring
access
