

Accent Any Décor

The Thermostat 565 offers a slim, 9/16" profile with a white finish. A stainless steel trim ring, and a choice of five touchscreen color themes will complement any home's décor.

Better Design. Better Control. Better Systems.

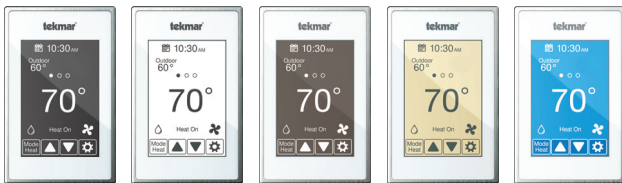

Choose your thermostat solution from the control industry leaders with over 30 years of expertise. Ask your contractor / wholesaler for tekmar Thermostats and look forward to comfort, convenience and energy efficiency for years to come.

Wiring Worries are Over

Eliminate:

- Pulling new wires
- Patching & repainting walls
- Batteries
- Unreliable power stealing
- Unreliable wireless signals

Lack of Wires, No Problem, We Have You Covered

The Thermostat 565 uses the existing 2-wires to connect the display in the living area to the HVAC Interface Module in the mechanical room.

Works With Most HVAC Systems

Conventional systems:

- Up to 2-stage heating, 2-stage cooling, fan and 2 accessories

Heat pump & dual fuel systems:

- Up to 4-stage heating, 2-stage cooling, fan, reversing valve and 1 accessory

Accessory options:

- Humidifier, dehumidifier, HRV/ERV ventilator

Peace of Mind

The 565 displays an alert notification on the screen if a problem is detected with the HVAC equipment. When used together with a Watts FloodSafe™ Water Detector Shutoff, the 565 will notify you if the supply to the water heater has been shut off to prevent flood damage.
