Residential Purge, Drain, and Balancing Valves

Watts® Series RPVM1-Press residential purge, provide a unique and low-cost solution for start-up purging and draining of hydronic heating loops. Boasting a rugged, dual-ball valve design—the small and compact RPVM1-Press facilitates high volume purging, tight shutoff, and hose connection for draining and purging. **Available in ½"-2" sizes.**

Features Include:

- **Integral purge port saves time and money** compared to purge stations made with a ball valve, boiler drain, and copper tee
- **Ball valve purge port** – purge port has a ¾" hose thread with cap
- **Positive shutoff dual-ball valve design** – port maximizes purging
- **Cast purge port handle**
