

The Thermostats You Rely On Just Got Better!

◀ **NEW tekmar Thermostat 518**
Replaces tekmar Thermostats 507 & 508

NEW tekmar Radiant Thermostat 519 ▶
Replaces tekmar Thermostat 509

Includes Slab Sensor 079

What's New?

Easier to Wire

- Connect wires to a wall mounted base instead of the back of the thermostat

Easier to Use

- Simple up / down triangle shaped buttons make these thermostats completely user friendly
- The 'Heat On' indicator provides operational status

Easier to View

- A bright white backlight & large numbers make it easy to read the display in all lighting conditions

Auxiliary Sensor Options

- Floor temperature control with floor minimum & maximum settings
- Dual temperature display of outdoor, floor or remote temperature depending on auxiliary sensor selection

Simple Installer Access

- No need to open the thermostat to access DIP switches
- Limit homeowner access to installer settings

What's the Same?

Just like the previous models, the 518 & 519 are designed to maximize comfort in radiant heating systems by providing warm floors while reducing temperature swings.
